

TOSO

Corporate Profile

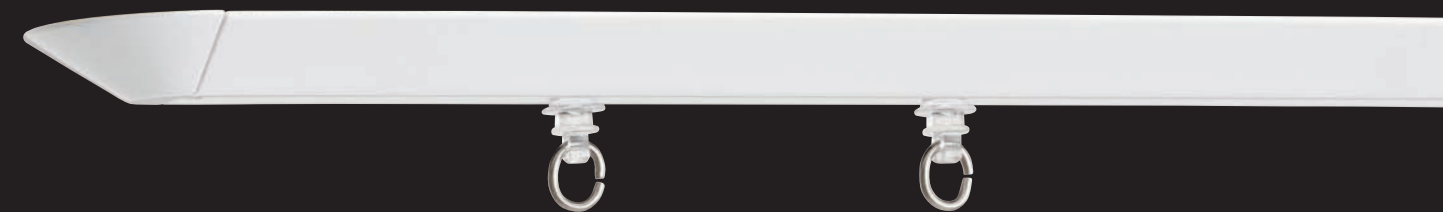

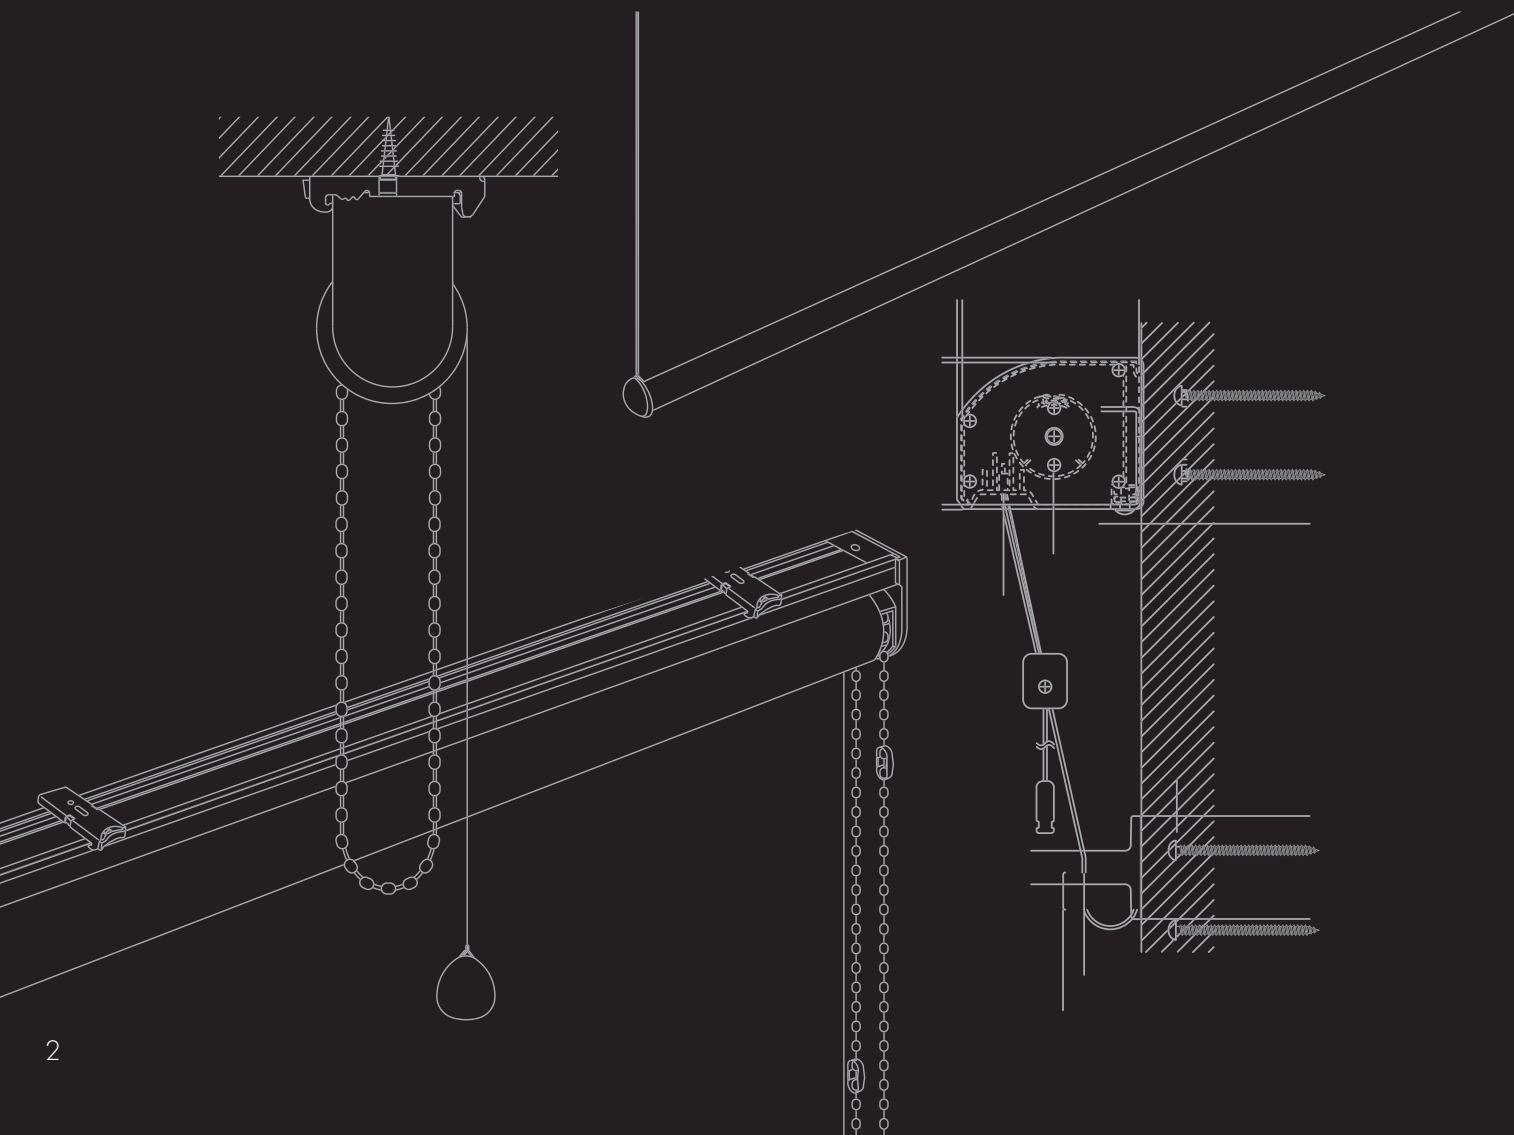

TOSO COMPANY, LIMITED
1-4-9 Shinkawa, Chuo-ku, Tokyo, Japan 104-0033
<https://www.toso.com>

New Window View. New Outlook.

A new look. Or new comfort.
Reinvigorate your life with interior design.
Start with a new window.
Enjoy a new lifestyle. Live in a superior place.

For more than half a century since its establishment in 1949, TOSO Co., LTD. has maintained its position as Japan's leading manufacture of curtain tracks. Based on the trust in us by our clients and customers, we have been constantly evolving as a comprehensive "window treatment corporation".

TOSO is 70th anniversary,
in September 2019.

Group Corporations

TOSO 东装

TOSO Window Treatment
(shanghai) Co., Ltd.

Manufactures and sells window
treatments in China. Offers
curtain tracks, blinds, and other
products incorporating quality,
design, and technology
developed by TOSO in Japan.

TOSO

TOSO Ryutsu Service Co., Ltd.

Provides logistical support for the TOSO Group's customer
service efforts by warehousing and shipping TOSO products,
and by performing distribution processing services.

Silent Gliss Corporation (Japan)

A joint venture with Silent Gliss of Switzerland, the developer of
the world's first silent curtain track. Imports, manufactures, and
sells window treatments incorporating refined European design
and innovative mechanisms.

TOSO

P.T. TOSO INDUSTRY INDONESIA

TOSO production facility located in the Indonesian
capital of Jakarta. Employing metal press, plastic
molding, and a broad range of other production
technologies, is capable of producing a diverse
range of products in small lots. ISO9001-certified
and produces goods at Japanese standards of quality.

TOSO

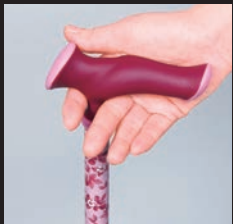

TOSO Service Co., Ltd.

Sells, installs, and maintains interior products made by TOSO and other companies, as well.
With proven skills and a broad range of consulting capabilities and expertise in areas like interior
design and renovation planning, helps to create spaces that perfectly suit customers' needs.

Fuji Home Co., Ltd.

Develops and sells long-term care items.
Takes pride in promoting a barrier-free
society by creating goods that improve
daily life for the elderly and disabled.

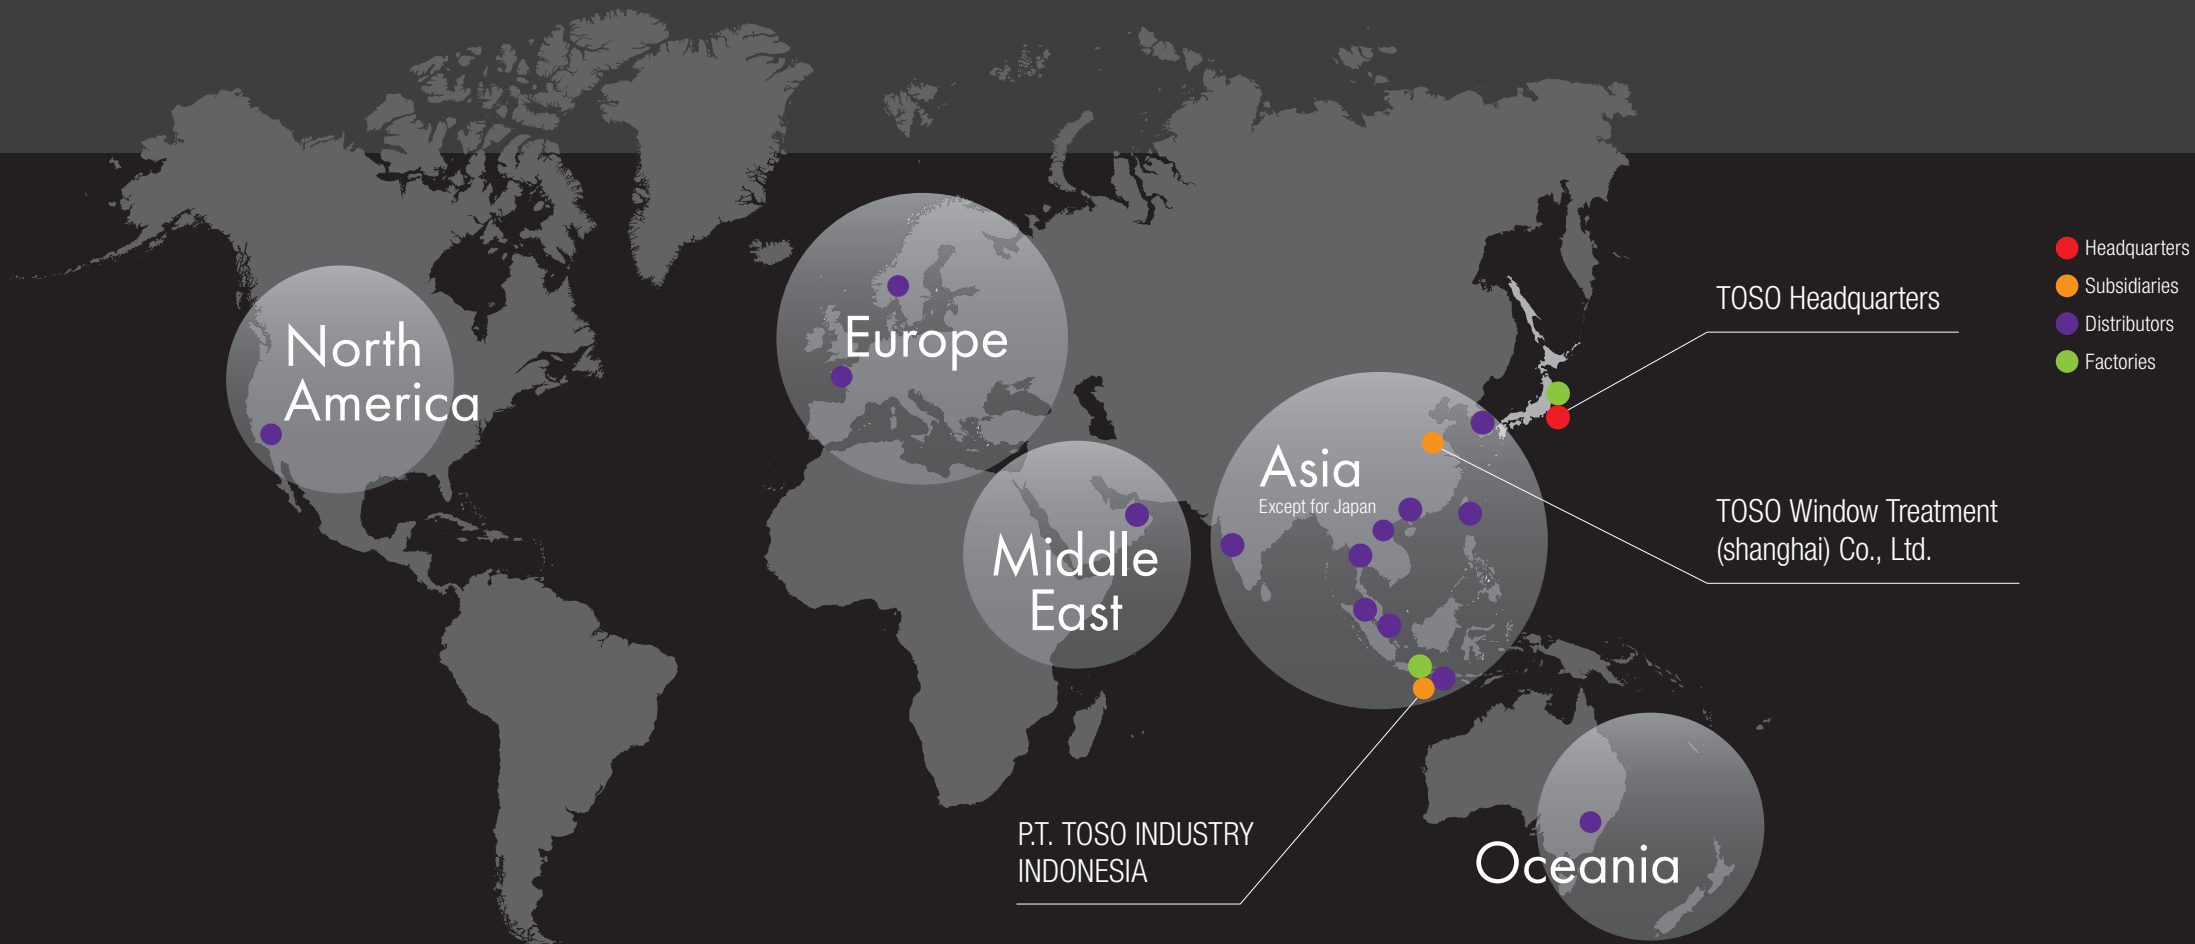

Global Activities

TOSO commenced the overseas production of curtain tracks
under license agreements in 1979.

TOSO was also the first Japanese manufacturer to exhibit at
Heimtextil, the world's largest upholstery fabrics trade show,
in Frankfurt, Germany.

Our activities to develop overseas sales are progressing at
full speed.

Proposal Activities

Event

TOSO sponsors and participates in various product exhibitions to bring the latest TOSO products and the newest overseas products and styles to our customers. At these exhibitions, customers can see and touch curtain tracks, accessories, and other products drawing on cutting-edge designs and functions to produce refined room interiors. In Japan, we sponsor Window Fashion Fair events throughout the country.

JAPANTEX 2018

JAPANTEX is the largest trade show for interior design and decorating, and home textiles, in Japan. TOSO participates in JAPANTEX every year and has gained attention from overseas participants and visitors, as well as from domestic quarters, for the quality of our presentation and products.

R+T 2015
(Germany)

At R+T 2015, held in Germany, TOSO products were available for visitors to handle and manipulate, and were widely praised by people working in interior design and decorating but also in a wide array of areas related to construction materials, as well.

Interior Seminar

with Curtains 2018

“with Curtains” seminars sponsored by TOSO are a valuable information channel for customers. Each seminar is led by an industry expert, and is open to participation by people working in interior design and decorating. At a typical “with Curtains” seminar, participants might hear a product developer from a major Japanese curtain manufacture talk about factors behind the development of a new product and about the product’s differentiating features. “with Curtains” seminars aim to contribute to the advancement of the entire industry by disseminating information on the relationship of interior environments to daily life.

Publishing

TOSO puts out publications on not only window treatments but also the relationship of interior environments to daily life. Over the last 50 years, our publications have covered trends in interior design and decorating, shown photographic images of completed decoration work, explained terminology, and offered a broad range of other information for everyone from industry professionals to consumers.

Environmental Initiatives

Eco-friendly Materials

TOSO products actively incorporate environmentally friendly raw materials. TOSO’s curtain tracks, blinds, and other window components made from wooden materials are composed of planned plantation, laminated wood, and other natural resources selected for use to eliminate waste. The metal curtain track coatings contain an olefin-based resin that generates no harmful chlorine gas or dioxins even when incinerated* at the end of product life. TOSO’s window screens conform to the standard promoted by the Ministry of the Environment under the Green Purchasing Law (for products composed of at least 10% recycled PET fibers.)

A roll screen made from the recycled PET fiber “Orb”
*Excludes some products.

Wooden blinds and wooden curtain tracks made from laminated timber

Tree-planting activities in the Republic of Indonesia
Forest depletion caused by excessive logging has become a serious problem in Indonesia, resulting in a lack of safe water, poor crop yields due to degraded soil, and frequent floods and landslides. As a prominent member of Indonesia’s business community, our company group has been planting trees to regenerate the forests. TOSO has been planting trees in cooperation with the Mount Walat Institute of Forestry at Bogor Agricultural University since 2009.

ISO 14001 Certification in Environmental Management

TOSO became Japan’s first manufacturer in the curtain tracks industry to acquire the ISO 14001* certification, the international standard for environmental management systems, in 2002. We understand, of course, that environmental activities are performed for the environment, not to obtain the certification. Our Tsukuba Plant has achieved a recycling rate of 99% or more for waste materials. Our manufacturing departments are working with all of the other departments in our company to protect the environment. We are determined to pass on the baton in the world’s multigenerational quest to keep Earth beautiful in the future.

Certificate No : 233614/B

Carbon Footprint

The carbon footprint is a quantification of the amount of CO₂ emitted during all stages of a product life cycle, from the procurement of raw materials to production, distribution, use, disposal, and recycling. By visualizing CO₂ emissions we can grasp the processes that generate the most CO₂ and work towards efficient reduction. Consumers rely on the carbon footprint for guidance when selecting products with low environmental impact. TOSO also has certified the system of outside suppliers for parts and obtained a “system certification” that allows the CO₂ emissions calculated by outside suppliers to be displayed as needed. If the carbon footprint of an item can be calculated under this system, the item can be certified in-house. TOSO will be gradually expanding the products targeted for carbon footprint certification and reducing environmental burdens by promoting the spread of the system.

Picture Rail

In curtain tracks, the product with which TOSO got its start, we have lead the Japanese market ever since our founding a half century ago. Underpinning that strength and stability are constantly evolving designs, functionality, and a wide-ranging product line.

Motorized Products

Our wide ranges of motorized products make it possible to meet various requests not only for residences but also for the public places such as hotels and office buildings.

Motorized Curtain Track
Progress 25/50/80

Motorized Roller Blind
Mytec AT

Venetian Blinds

We offer high-performance aluminum blinds and flawlessly designed wooden blinds such as functional slats (heat-shielding/photocatalyst) with excellent energy-saving performance.

Pleated Blinds

Drawing on the uniqueness of the pleated screen and emphasizing refined design, SHIORI, our Pleated Blinds express variations of Japanese essence in creating soft spaces that soothe with the whimsy of light.

Roller Blinds

The Mytec 01 is a proposed roller blind with various optional parts and consistently excellent operability for different scenes of use. The Ti-1029 is highly usable roller blind easier with a simple structure and basic functions.
